I was quite unsure and stressed when I first started at Campus. I didn't know if I could manage all of 'life' away from my family and friends. Would I make new friends? Would I cope with the study?

Living on Campus has helped me, as I am surrounded by other students and we help each other out! We work together, providing much needed encouragement and support that really helps me get through the study and assignments. Lectures are only a short walk away, and the additional study assistance is great. When I need a break from study, I can walk to the gym, hang out in the common room or use the pool. Staying at halls has helped keep life and study in balance!
